

# **Winchester Utilities**

## **Water and Sewer Inspections**

Once a sewer or water tap has been purchased, Winchester Utilities requires a five (5) day notice for installation of the tap and/or final inspection of the tap site.

All work for service line installation must be performed by an individual holding a State of Tennessee Plumber's License.

New and replacement water and sewer service lines must be inspected by Winchester Utilities before being covered up and before services can be cut on.
